PROFILE

As Business Process & Application Consultant for E-Services and E-Commerce at Knorr-Bremse Services GmbH, I'm directly supporting the global growth of the Online Sales Business of the whole Knorr-Bremse Group. In the last few years, I've been working as a Workstream Lead with various cloud-based applications, such as part of the implementation of SAP Commerce Cloud. In addition, I started my own small business in 2018 for consulting, design and development of web-based solutions. To further grow my knowledge in these fields, I studied Business Informatics at the FOM University of Applied Science, where I graduated in 2021.
